

Appropriate clothing for weather conditions both predicted and NOT predicted. Pack extra clothing in case scout becomes wet.

Backpack fitted to the scout with external frames. Consider a rain cover for backpack as well.

Blanket if camping in cold weather. Place blanket inside sleeping bag. The scout should always change clothes immediately before sleeping if camping in cold weather. This will ensure that sweat will not be on the clothes the camper is sleeping in, which will cause the scout to become chilled.

Boots for Rain or Water Shoes in the Summer

Bug Spray

Camera, disposable is best, packed in a ziplock bag and marked with name and phone number.

Camp soap, found in a bottle, which can be used for the body and hair as well as for dishes and other items.

Camping stool, sometimes used for fishing. These are about a foot high and are shaped like a tripod. They are easy to fold and store and can be carried on a belt.

Clothing - As a precaution, pack all clothes in large ziplock bags in case it rains. Some scouts will put together an outfit for each day - lay out your pants, place your shirt, underwear and socks in it and roll it up tightly. Place in a large ziplock storage bag. Each day, simply pull out one bag. If your backpack becomes wet from rain, all of your clothes will remain dry. (But honestly, have you ever known your scout to even change clothes on a weekend camping trip!?)

Compass and Map

Cup

First Aid and Sewing Kits

Flashlight and Spare Batteries

Flint or Water Proof Matches

Gloves if camping in cold weather. Waterproof is best.

Hand warmers

Hat to provide shade in summer.

Hiking boots sprayed with waterproof sealer.
